## NONCOMBATANTS MASSACRED BY SERVIANS

### BIG MELON CUT BY KOLOA

Quarter of a Million Dollars To Be Paid Out by the Plantation

STOCK DIVIDEND OF FIFTY PER CENT.

Payment To Be Made to Stockholders First Monday in December

At their meeting yesterday afternoon at the office of H. Blackford & Co., Ltd., the stockholders of the Kolosua Plantation Co., Ltd., declared a stock dividend of 50 per cent, which amounts to a cash dividend of \$100,000. This dividend comes from the profits and loss account and illustrates what a gold mine is this plantation.

The dividend will be payable on December 3, when each shareholder of the plantation stock will receive one share for every two shares held. Kolosua stock has rarely in late years been in such a high position. It has been known as something to be held on to with a tight grip. Last week plantation stands at \$100 a share, and the value being \$100 a share.

This was considered a good time to distribute the profits in the treasury. The dividend was given the unanimous approval of the stockholders.

### PRIVATE IS UNFAIR, SAYS COMMISSION

Harbor Board Declares Has No Intention of Secret Pact with Oil Company

No "private agreement" with the Associated Oil Company has been discussed, will be discussed or has ever been contemplated by the board of harbor commissioners, according to statements of commissioners made today.

A report published this morning that the commissioners had gone into executive session last night after a session to discuss a "private agreement" with the Associated Oil Company stirred not only the public in general, but the commissioners themselves. Citizens wished to know if the board was entering into a private agreement with a public service corporation, while the commissioners were wroth because their action, they declared, had been badly misinterpreted.

James Wakefield, who made the motion for the executive session, was asked by the Star-Bulletin this morning for the facts in the case and responded by saying that the commission never had any intention of entering into an agreement with the oil company without giving full publicity to the terms and plans.

The purpose of the executive session was to discuss a form of agreement among themselves so that they could talk it over fully and freely. The particular reason for wishing to go into executive session was that the outline of the agreement which was wished to discuss had not yet been submitted to the attorney-general and we did not wish to go on record or to take any final action without consultation with him. Usually we have had an opportunity to submit the various agreements to the attorney-general in advance of our board meetings, but we were unable to do so in this case, and to give him every freedom to make suggestions for changes, we did not wish to commit ourselves beforehand.

"I made the motion to go into executive session and neither in this motion nor in the discussion was there any use of the word 'private' in reference to the agreement."

### NEW NATIONAL GUARD ARMORY AS IT WILL LOOK WHEN COMPLETED

#### Dirt Will Begin to Fly for Foundation Early in December

The new National Guard Armory, for which the citizen soldiers and their friends have been fighting for several years, is at last to become a reality. The first dirt will fly on the old barracks lot, Miller and Hotel streets, in preparation for the construction of this essential and most important addition to the Territory of Hawaii.

The building as planned now is to cost in the vicinity of \$135,000, and \$100,000 of this amount already is appropriated, having been set aside by the legislature in 1911. The remaining amount probably will be added by the

legislature which convenes next month. The armory will be the largest public structure in the islands, and the largest building of any kind with the exception of the Alexander Young Hotel. Like most big modern edifices of its kind the architectural lines will be of the simplest simplicity. Containing two stories and a full basement, with dimensions of 200x235 feet and reinforced concrete building, it will be one of which the citizens of the islands may well be proud. In its interior design it will contain every modern feature of the best armories in the country, and in size it will be sufficient to accommodate all conventions or other public gatherings that may be held in the Territory for many years to come.

Its front, looking on Hotel street and across to the Capital is to be 200 feet in width. The only architectural feature, breaking the plain straight lines of the exterior is the small inset at the main entrance, where a twenty-foot wide passage leads up a slightly inclined floor to the level of the big drill shed, past the front offices and the stairway leading to the second or top floor. This drill shed will be set directly in the center of the building, surrounded by the many offices of officers, the assembly rooms of the various companies and the pool and billiard room that is to be provided for the men. The hall will be 100x170 feet in size. It is two stories in height, extending to the roof. Above it, around the sides of the second floor, will extend a gallery ten feet in width, which may be occupied by spectators during conventions or other large meetings. The seating capacity of the drill and gallery combined will be between 2000 and 3000.

The second-story gallery will be an area way leading to the locker rooms, the social hall to be used for company entertainments, the library for the guardmount and the large hall set aside for the use of the local post of the G. A. R. and the Spanish War Veterans. These apartments have the sides of the building on the ground floor, all having plenty of windows for fresh air and sunlight. The basement, which is to be entirely below the street line and the full size of the main building, will have concrete floors, and is to be divided into storage rooms, gymnasium locker rooms, the gymnasium which will be two stories in height, showers, rooms, restrooms, etc.

Over all will rest a steel truss of beams and girders, covered with felt and gravel. Governor Frazar and Superintendent H. K. Bishop of the Department of Public Works, through whom the architectural plans are to be placed and awarded their design, are working on the plans. The preliminary work probably will be in readiness for contractors during the first two weeks in December. It is hoped to have the structure finished and ready for occupation late next summer or fall.

### MAY TEST AVIATION THEORIES ON THE PLAINS OF LEILEHUA

Department Planning to Send Fleet of Aeroplanes to Local Post

Special Star-Bulletin Correspondence: "Almighty Father, Who can still The raging of the storm at will, Those who cannot save on land or sea, And if Thou wilt no harm can be, Oh God, extend Thy saving care To those in peril in the air!"

SCHOFIELD BARRACKS, Nov. 14.—The above hymn, which was sung at a recent funeral service at Hyde, England, for victims of the army aviation disaster near Hitchin, has a peculiar interest for more than one during young outdoor at Schofield, for its words have gone forth that within a short time a small fleet of army aeroplanes will be brought to Oahu. The War Department seems to be turning to Hawaii as the proving ground for many of the theories, and Schofield Barracks now the largest post in the army, with its acres of gently rolling country and climatic advantages, has been marked for aviation experiments.

This news comes in a private letter written by an officer now in the States, to a friend here. The information is considered reliable, for the writer would know whereof he speaks and it is expected that within three months at least three, and possibly more flying machines will be assembled at Leilehua, with several experienced army airmen in charge of their operation, and of the instruction of a number of officers now here who have expressed a desire to volunteer for aviation work.

The sending of several aeroplanes to Oahu is not a complete surprise. In fact, army men here have been wondering for some time past what has caused the delay, for the tip went out several months ago that aeroplanes entered into the calculations of the defense board, which convened here last July, and which went into elaborate plans for defending Oahu from invasion.

Two monoplanes of the type recently favored by military authorities, and one Curtiss bi-plane, are to be the basis of Hawaii's aerial navy, which is to be added to as fast as there are competent flyers available.

Not only will the flying experiments here develop the use of the aeroplane for scouting, but also according to rumor, as an agent of actual combat. To date there has been little done

with military aviation other than scouting and the dropping of bombs, but unquestionably the flying machine has grimmer war possibilities. It can also be used as an engine of destruction, not by means of bomb-dropping attacks of a few aeroplanes, but by the organized onslaught of large squadrons of weight-lifting machines, which will be able to rain down tons of missiles over any given spot. On a top-land terrain such as this, aeroplanes could be used to great advantage to prevent the landing of an invading force.

Aeroplanes on Oahu would have one great advantage over the air fleets of Europe and continental United States, because the local flyers would not be opposed by a hostile air squadron of equal strength. The opinion prevails now in foreign military circles that the next great war will see aeroplanes mounted with light guns firing explosive shells at each other, and that battles will be fought above the ground. A force invading Oahu could hardly bring more than a few light machines for scouting purposes, which gives color to theory that the United States intends to build up a strong protective aeroplane fleet here.

### GILMORE SAID OUT OF FAVOR

Reports of Resignation Have Been Going Rounds for Some Time, It Appears

News by wireless from California, published this morning, that President John W. Gilmore of the College of Hawaii has been appointed to the chair of agronomy at the University of California, did not come with as much surprise to a number of educators here as to those who have not been following school matters closely.

Although no statement could be secured up to this afternoon from the regents of the College, it has been rumored for several weeks that President Gilmore, who has been on the mainland, would not return unless it were to pack his personal effects. Coincidentally there was the rumor that he would resign from the college faculty and accept a mainland position.

### WISHES FREAR'S AALA PARK LAND

Rumor Says Syndicate Is After It for Big Theater Site

Governor Frear has received an offer of \$27,500 for his property at Aala Park. He is said to be holding out for \$30,000. It is rumored that a mainland syndicate wants the land for a site for a large modern theater. Mr. Frear, it is said, paid only \$3000 for the land with a building thereon some years ago.

This pending deal illustrates the revolution that is occurring in real estate values in the Honolulu business section. The Federal site condemnation cases have furnished other illustrations, and the dicker for the Equestrian Lodge's property and the rumored negotiations for the Catholic Mission property are also in point. While at first thought some may deem the Aala Park locality unsuitable for a high-class theater, there are several considerations making it appear quite desirable for that purpose. It is central both to the railway and rapid transit travel. Besides being on the edge of one of the most densely inhabited parts of the town, it is at the gate of both Nuanuan and Kalihi valleys with their highly respectable populations.

President Gilmore, it is said, on good authority, has been out of favor with the regents for some time. One of the reasons is said to be that he did not get along with his teachers with the maximum of success, and the regents are declared to have differed with him on certain questions of policy regarding the inclusion of various courses in the college which are held not to have been entirely of the practical nature desired.

The ability of Professor Gilmore was not questioned; it is said, but when opportunity came for him to obtain an excellent position on the mainland, no obstacles were thrown in the way of his acceptance by those at the head of the college administration here.

Small consignments of sugar, with shipments of rice, bananas and preserved pineapples will make up the bulk of the freight carried in the Oceanic liner Sierra, that is to sail for the coast at noon Saturday.

### CORONER'S JURY FAVOR REVOKING CHINESE HERB DOCTOR'S LICENSE

Has Been Practitioner in Islands for Twenty-five Years

Chew Fong, a local Chinese herb doctor, may get himself in serious trouble as a result of the finding of a coroner's jury impeached by Coroner Charles Rose, which body of men has completed an investigation of the case of death of a Chinese patient. The jury in rendering a verdict of death through natural causes strongly recommends that the license to practice medicine in this Territory be revoked, the same having been placed up to the Territorial board of health and the members of the board of medical examiners.

The Chinese patient, who passed away at the hospital as a result from a kick from a horse, suffered a badly fractured leg. The accident was first reported to the police on October 31. Officers were summoned to the home of the Chinese and efforts were made towards his removal to a hospital. It is alleged that the Chinese patient refused to enter such an institution, preferring to remain at his home.

Chew Fong, a local herb doctor who has been practicing in the islands for the past twenty-five years was called to attend the patient. Testimony adduced at the inquest was to the effect that instead of administering medicines or taking any steps whatsoever

effect that the Chinese came to his death through natural causes, to blood poisoning. The jury, however, added this, it recommended that the license now held by Chew Fong to practice medicine in this Territory be revoked, the same having been placed up to the Territorial board of health and the members of the board of medical examiners.

### DAVID SOLVES LONG SECRET OF ADDING TO ONE'S OWN STATURE

Territorial Treasurer David Lloyd Conkling, after years of research and patient, plodding effort, has discovered one of nature's secrets. He has learned how to grow tall.

This may come as something of a surprise to his friends, who probably never dreamed that Conkling ever thinks of anything in the way of figures other than taxes and assessments. But now he reveals himself in a new light. He has found the secret of physical elongation, an unmediated, painless and perfectly easy system requiring only tenacity of purpose and untiring persistence.

And to prove his contention he points to himself, on whom he has been conducting this scientific experiment. Today he measures five feet, four and three-quarters inches in height. He avers that four years ago he was just one inch shorter.

As already stated, his system is painless. Here it is: Every morning before arising he stretches out at full

length on the bed, reaching with feet and arms just as far as he possibly can without straining muscles. This procedure is tried first while lying on his back, then again while lying on his stomach. He asserts moreover, that the exercise, if such it may be termed, has a tendency also to induce a feeling of restfulness, driving away nervous tendencies and to encourage that placidity of temperament so often needed at the beginning of a day's hard toil.

Whether there is a limit to the stature a man may reach, he has not been able to ascertain, but from the figures he estimates that by the time he has attained the age of three score and ten years he ought, if the figures hold true, to stand about six feet tall.

The Pacific Mailer Siberia sailing from Honolulu on November 1st is reported to have arrived at Yokohama, the first port of call in Japan on last Tuesday.

### SLAUGHTER OF INNOCENTS IS REPORTED

Albanians Sufferers from the Rage of the Feroce Conquerors

TURKEY TO SUE FOR PEACE TO HER FLEE

Sultan to Appeal Direct to the General Commanding the Invading Army

(Associated Press Cable) BERLIN, Germany, Nov. 14.—Reports from the East concern the Albanians who have fled before the Turkish conquerors. The Albanians are suffering from the rage of the feroce conquerors. The Sultan is to appeal direct to the General Commanding the Invading Army. ### LONGWORTH DEFEATED

(Associated Press Cable) CINCINNATI, Ohio, Nov. 14.—The Longworth is defeated. The Longworth is defeated. The Longworth is defeated. The Longworth is defeated. The Longworth is defeated.

### ELEVEN DIE IN WAGON

(Associated Press Cable) OTTAWA, Ont., Nov. 14.—Eleven of the passengers and crew of the passenger Mayflower drowned when that ship sank near here this morning. The steamship, a river boat on the Mackinac river, sank almost without warning, and many were hurt in the scramble to get away.

### GOVERNOR APPOINTS LICENSE COMMISSIONERS

By making two appointments the Governor today again completed the membership of the liquor license commission for the city and county of Honolulu. Carlos A. Long, who resigned before election, is reappointed since he failed of election. Alfred Castle is appointed to take the place of Clarence Cooke, who resigned prior to the election and proved successful in his candidacy for representative for the Fourth district.

Raw sugar in New York yesterday was steady; 96 test centrifugals, still 4.05.

Closing quotations for Hawaiian stocks in San Francisco, yesterday were as follows: H. C. & A., 34.75 asked; Hawaiian Sugar, 40.25 asked; Honokaa, 16 asked; Hutchinson, 33.25 bid; 19 asked; Kilauea, 12 bid; Oonika, 35.25 bid; 30.25 asked; Punahele, 20 bid, 20.50 asked; Honolulu Plantation, 35.50 bid, 36.50 asked.
